

We have exciting news to share: The Town of Ancram is launching the Solarize Ancram project!

Ancram has partnered with Solstice Community Solar to bring affordable, clean energy to Ancram residents, town buildings, and businesses.

The Solarize Ancram campaign will be hosting a webinar at 7:00pm on Wednesday, March 17th, to share more information about how you can participate. During this webinar you'll learn how community solar works, how it will benefit our town, and how you can earn \$100 upfront just by joining at no cost. Please RSVP using this [registration link](#).

Community solar is a win-win-win for Ancram residents:

A win for your household:

All Ancram residents are eligible to join a nearby shared solar farm and save money on their monthly electric bills--with no upfront costs or changes to their property. Subscribers receive a 10% discount on power from their solar farm through the New York State Community Distributed Generation Program. The result is savings for all participants.

A win for the town:

For every Ancram resident who enrolls in the program, Solstice is donating \$100 toward an energy-efficiency upgrade for Ancram's town hall.

A win for the planet:

By supporting clean energy, we reduce our dependence on fossil fuels and do our part to reverse climate change.

To learn more about our partnership with Solstice before our webinar, [click here](#). Don't forget to [register](#) for an opportunity to ask questions of Solstice representatives and the Solarize Ancram team about our campaign!

We hope to see many of you in attendance. If you are unable to attend the webinar on March 17th, we will be having two additional webinars, in April and May.

Yours sincerely,

Colleen Lutz, Climate Smart Community Task Force (CSCTF) Member
